Individual Brainstorm

 **Question #1:** Describe your website subject in detail:

What do you already know about it? (50+ words)

Ideally I want to create a website, that through the use of data scraping from spotify, will give me information on the music that the user has been listening to for some type of extended period of time. This information will be things like most streamed artists, albums, songs, albums and genres.

What do you need to find out? (20+ words)

Well, first I need to understand how I want the website to be visually. Then, I'll need to learn how to use spotify's api to accrue all the data I need to be able to see the musical data of interest.

Who is involved with this topic? (20+ words)

In terms of who is involved with this topic, I hope to create a website that can be used by multiple users. All they need to do is to connect their spotify accounts to this website!

 **Question #2:** Describe your proposed website in detail:

What is the purpose of your website? (30+ words)

The purpose of my website is ideally for the user to understand their music listening habits on a day, weekly, and monthly habits. The idea of this website is also to see some meta-analysis of the genres the user listens to and guess the mood they've been experiencing.

Who is your intended user? (30+ words)

My intended user is, of course, anyone who listens to music consistently for enough meaningful data to be represented preferably on spotify. It is also meant for individuals who like to share their music habits with friends and communities as well!

How will your user interact with your website? (30+ words)

I believe that my website will be very interactive in its usage as there will be user enacted animations that slide from page to page that show different music information.

Wireframe

? When creating your wireframe, ask yourself:

- What about your topic do you want shared on your website?
- How do you want your content and website structured?

? Copy/Paste a screenshot of your wireframe or a link to it below (if using a link, make sure it is publicly viewable).
